

## **Foothills Medical Group welcomes Asim Makhdom, MD**

Bradford Regional Medical Center welcomes Asim Makhdom, MD, orthopedic surgeon, to its medical staff and the Foothills Medical Group.

Dr. Makhdom is the only orthopedic surgeon in the area to perform anterior total hip replacement which is less invasive and decreases healing and recovery time for patients. He also performs:

- partial and total knee replacements
- revision hip and knee replacements
- adult and pediatric trauma surgery
- knee arthroscopy for meniscus injuries or cruciate ligament reconstruction
- bow legs and knocked knee correction
- leg limb discrepancy correction
- reconstruction surgery for complex bone nonunions or malunions
- bunion and carpal tunnel surgery.

Dr. Makhdom is currently accepting new patients at 195 Pleasant St., Suite 5. Appointments can be made by calling 814/362-5701.

### About Dr. Makhdom

Asim Makhdom, MD, completed an orthopaedic residency training program at McGill University in Montreal, Canada, where he also joined the surgeon-scientist program and obtained a master's degree in experimental surgical research. Dr. Makhdom then completed a one-year fellowship, training in hip and knee arthroplasty at Rothman Institute, Thomas Jefferson University in Philadelphia. This was followed by one year of fellowship training in complex bone conditions and reconstruction at the Hospital of Special Surgery, Cornell University in New York City. Dr. Makhdom is board certified in orthopaedic surgery from the Royal College of Surgeons of Canada and is board eligible from the American Board of Orthopaedic Surgery. He has a strong interest in scientific research and has published numerous peer-reviewed papers and received multiple research prizes and awards at the national and international level for his contribution in the field.
